

How to Talk with AI

Good ideas become better when you explain them clearly.

Name: _____

Date: _____

You do not need special coding words. Tell AI **what** you want to change and **how** you want it to look or work.

1 Bad Prompt vs Better Prompt

BAD PROMPT

“Make my app better.”

BETTER PROMPT

“Change the app color to blue and make the title bigger.”

Why? AI knows exactly what to change.

BAD PROMPT

“Change the picture.”

BETTER PROMPT

“Change the mission-image icon to a rocket.”

Why? The screen part and the new icon are both clear.

BAD PROMPT

“Fix this.”

BETTER PROMPT

“The Add button does not work when I click it. Please check btn-add-record.”

Why? AI knows what happened and where to look.

2 My Request Formula

I want to change _____.

Please make it _____.

Keep _____ the same.

3 Write My Prompt

What do I want to change?

How should it change?

My AI prompt

4 Check and Reflect

What changed?

What did I learn?

5 One Step at a Time

1

Ask for one change.

2

Save and test it.

3

Fix any problem first.

4

Then ask for the next change.

You are the creator. AI is your project partner.
